Daily Message:

Flow Past Glen Ullin Capacity Reduction (Posted 9/16/2020)

Details:

Flow Past Glen Ullin Capacity Reduction (Posted 9/16/2020)

New: NBPL will begin planned maintenance at Trimont Compressor Station (CS13). The Flow Past Glen Ullin location (LOC# 43) capacity will be reduced to 2,155-MMcf/d from 10/12 - 10/ 16.

Based on current nominations, it is anticipated that this posting may result in the capacity allocation reduction of IT, Firm Secondary and potentially a portion of Firm Primary volumes. Since NBPL anticipates that this restriction may impact its ability to deliver all nominated Firm Primary services, NBPL will apply the Reservation Charge Crediting Mechanism of Northern Borders FERC Gas Tariff Section 6.6.7 as necessary.

Please contact your Northern Border Nominations Representative with any questions regarding nominations or scheduling at (888) 750-6275.

Please contact System Operations with any questions regarding operations or facilities.
